

## Evening Cicada

I caught an evening cicada!

Better than an odding cicada...

Sometimes the subject is omitted in casual speech (**That's** better than an odding cicada...)

<b>General Information</b>	The evening cicada is native to East Asia (especially Japan).
<b>Key Word(s)</b>	evening, “odd”
<b>Pun</b>	<p>Evening means dusk in the first sentence. The pun uses evening’s other meaning, “to make even” and invents another word to complete the joke. “Odding” is meant to mean unbalancing.</p> <p>In other words: “I would rather have a cicada who makes things even than a cicada who makes things odd.”</p>
